## Language Kits: Incompatibility with Now Menus (3/95)

Article Created: 20 May 1993

Article Reviewed/Updated: 23 March 1995

TOPIC -----

Using NOW Menus 4.0.2 with the standard menu font, the input method has garbled information for the Kotoeri menu selection. Can you provide a workaround?

DISCUSSION -----

One workaround is to upgrade to Now Utilities 5.0. Another "partial workaround" is to select the Osaka font (or \*Beijing\* or Teipei for CLK) in the Now 4.0.2 Utility control panel and the Kotoeri (Simplified or Traditional Chinese inputs) menu option will display correctly; however, this will corrupt some other menu listings.

### Article Change History:

23 Mar 1995 - Updated article title for clarity.

15 Feb 1995 - Added info about Now Utilities version 5.0.
