## Powerbook: Adobe Type Manager 3.0 and Suitcase II 2.0 (5/93)

Article Created: 28 May 1993

Article Reviewed/Updated: 22 July 1993

TOPIC -----

My Powerbook crashes when I have Adobe Type Manager version 3.0 and Suitcase II, version 2.0 installed at the same time.

DISCUSSION -----

There is a conflict between these two system extensions. The conflict only occurs on a Macintosh that use a system enabler. Macintosh systems introduced on or after October 19,1992 use enablers. This problem will also happen with the 32-Bit enabler, which customers might use on the Macintosh II, Macintosh IIX, Macintosh IICx, or the Macintosh SE/30.

Adobe and Fifth Generation Systems, Inc. are aware of the problem and are working on it. Suitcase version 2.1.3 fixes this problem. Contact Fifth Generation Systems, Inc. for an update.

To locate a vendor's address and phone number, use the vendor's name as a search string.
