## System 7: Using Retrospect 1.3 with File Sharing Active (8/93)

Article Created: 2 August 1991

Article Reviewed/Updated: 27 August 1993

TOPIC -----

My System hangs after requesting either Restore or Retrieve in Retrospect 1.3 with file sharing turned on.

DISCUSSION -----

The System hang is caused by a corrupted desktop file following a backup with Retrospect 1.3. Here's how to solve this problem:

- 1) Rebuild the Macintosh's desktop file by holding the Command and Option keys down while restarting the system.
- 2) Install either  
    System 7 Tune-Up (if using System 7.0 or System 7.0.1)  
    System 7.1

Contact Dantz Development for the latest information about Retrospect versions and updates; search on Dantz for contact information.
