## Retrospect: Backing Up Multiple Volumes to Same Tape (8/93)

Article Created: 17 August 1993

TOPIC -----

How do I back up multiple volumes to the same tape using Retrospect?

DISCUSSION -----

Retrospect allows you to do this automatically. Just select each volume you want to back up in the Volume Selection window. You may select a range of volumes using the Shift key, or make a non-contiguous selection using the Command key.

When you execute the backup, Retrospect will back up each of the selected volumes, one after another.

For further information on working with Retrospect and Retrospect A/UX, search the Tech Info Library by "Retrospect" or "Remote."
