## Retrospect: Execution Errors Browser (8/93)

Article Created: 18 August 1993

TOPIC -----

What is the Retrospect Execution Errors Browser?

DISCUSSION -----

When Retrospect detects compare errors while backing up, write errors while retrieving, or read errors while retrieving or verifying, it creates a Browser displaying the files involved. This Execution Errors Browser may be printed for reference, or copied and pasted into another Browser for easy re-selection.

What to do if Retrospect reports errors: Look in the Detail Log for the error message associated with each file.

For further information on working with Retrospect and Retrospect A/UX, search the Tech Info Library by "Retrospect" or "Remote."
