Canvas 2.0: LaserWriter Printing Problem

This article last reviewed: 28 August 1989

TOPIC -----

I have a problem when overlaying two objects in Canvas 2.0. According to Deneba Software, this is a known problem with the LaserWriter ROMs that has to do with an exclusive-or command. Has this known problem been fixed with the LaserWriter Rev 47 ROMs?

DISCUSSION -----

No, the problem remains. Tech Comm recreated the problem with the 2.0 ROMs (Rev 38 of PostScript) and with the 3.0 ROMs (Rev 47 of PostScript) on a LaserWriter Plus and on a LaserWriter IINT.
