## Jazz: Using it with Finder 4.1

Jazz is shipped with the older version of the Finder (1.1). You can use Finder 4.1 with Jazz if you like, you should not run into any problems. To change to the newer version of the finder, make a copy of the original Jazz Startup Disk that came in your Jazz package and install the new finder on it either by replacing the Finder with 4.1 version or by running Apples Finder Update program.

Note: When replacing the Finder you should startup your Mac with the disk with the newer Finder and then put in the Jazz Startup Disk. Finder 4.1 comes with the Choose Printer desk accessory, which is necessary for the LaserPrinter.
