## Jazz Word Processing: Printing Pages After Page 7

It has been reported that there is sometimes a problem printing a range of pages after page 7 in JAZZ word processing (ex. Print pages 9-12). Sometimes when trying to print a range of pages it will start printing at the beginning of the file. A solution is to copy and paste the pages you want to print into a new Word Processing document and then print that document. Also, you can always choose Save As from your file menu and click on Text Only -- then MacWrite can read your file. This can also be helpful when a document gets too long for the JAZZ Word Processor.
