4th Dimension: How to Customize the CLUT 9/89

Article Created: 18 September 1989

Some people have noticed a problem with the presentation tools with 4th Dimension when using splash screen that needed colors that weren't in the default palette. The following workaround is usefull if you need to change a few colors (for a Corporate logo, for example).

1. Copy the palette for the image using ResEdit
2. paste the palette for the image into 4th Dimension
3. Change the CLUT ID (color lookup table) to 0 so that it becomes the default palette on application launch. This way

Unfortunately, this solution means that you are stuck with that palette until changed in the application (for all files). To minimize this drawback, try starting with the default system palette and change only some obscure, less used colors in that palette to the ones you want and leave the other standard colors alone.
