4th Dimension 2.0.8: Needed for Macintosh IIci Compat. 12/89

Article Created: 22 December 1989

TOPIC -----

This article discusses the incompatibility of early versions of 4th Dimension with the Macintosh IIci.

DISCUSSION -----

The international releases of 4th Dimension version 1.0.8 and earlier DO NOT run on a Macintosh IIci. The incompatibility stems from the copy protection method used in 4th Dimension's international releases.

4th Dimension v2.0.8 is the Macintosh IIci-compatible international release.

(NOTE: The United States releases of 4th Dimension all work properly on a Macintosh IIci.)

For information on how to upgrade to a new international Macintosh IIci-compatible version, contact the distributor of 4th Dimension in your country.
