WingsZ 1.1a: Upgrade for System Software 6.0.5

This article last reviewed: 27 July 1990

TOPIC -----

I know there are compatibility problems with System Software 6.0.5 and Informix WingZ 1.1. I heard there is a patch for WingZ. Do you have any information?

DISCUSSION -----

Informix (makers of WingZ) recommends that customers call them to obtain version 1.1a of the software, which includes the fixes in the first-generation patch, and more.

Informix will mail the upgraded software to registered users free of charge.
