Radius RocketShare: PowerTalk Incompatibility (10/93)

Article Created: 15 October 1993

TOPIC -----

I'm using Radius RocketShare on a Quadra running PowerTalk. My computer hangs when launching Mission Control. It only happens if PowerTalk services are turned on.

DISCUSSION -----

Some change in the handling of the EFS made RocketShare look to the Mail Enclosures as a Rocket Disk (without of course identifying it as such.)

Radius is testing a maintenance update to be called 1.1.1 that will be posted to AppleLink, AOL, Compuserve and Radius Anonymous FTP.
