MacGlobe: Launching Problems - Nothing Happens (6/94)

Article Created: 13 Jun 1994

TOPIC -----

When I double-click on MacGlobe I get a screen with a Broderbund logo that tells me to click to begin. I click to begin and then it drops me back where I started. It never actually opens.

DISCUSSION -----

MacGlobe does not automatically open up a window and the menus across the top of screen don't change that much. After you have clicked to begin go up to the View menu and drag down to your selection (country, state, etc.).
