## Reading Maze and Color Printing to ImageWriter II (9/94)

Article Created: 16 August 1994

Article Reviewed/Updated: 15 September 1994

TOPIC -----

I am having trouble printing from Reading Maze to an Apple Imagewriter II with a color ribbon.

DISCUSSION -----

The Reading Maze program, included with the Apple Early Language Connections (AELC) package, will not print in color to an ImageWriter II with a Color Ribbon.

Reading Maze is produced by Great Wave Software. According to Great Wave, this program uses direct color Quickdraw routines that the ImageWriter II driver does not support. The Apple Color StyleWriter Pro and several Hewlett Packard printers will print in color with Reading Maze.

There is a third party product that may support color printing to the Imagewriter. Look at MacPalette, made by MicroSpot USA, Inc.

To locate a vendor's address and phone numbers, use the vendor name as the search string.
