## Drive7: Compatibility with Power Macintosh and System 7.5 (2/95)

Article Created: 20 February 1995

TOPIC -----

What version of Drive7 should I use on my Power Macintosh? Is it System 7.5 compatible?

DISCUSSION -----

Casa Blanca Works, makers of Drive7, strongly recommend that customers use at least version 3.0 of Drive7 for full Power Macintosh compatibility.

They stated that there are known Power Macintosh compatibility issues with Drive7 versions previous to 3.0. The current version of Drive7 is 3.0.9. Version 3.0 and later is also System 7.5 compatible.
