HD Setup: Use V1.3 Only To Restore Disk Formatted With V1.3

This article last reviewed: 25 March 1988

Full-volume backups taken from a hard drive formatted with HD Setup 1.3 are incompatible for restoring to drives formatted with HD Setup version 1.5. Also, depending on the manufacture of the hard drive, the formatted disk space for the same size drive will vary by as much as 1MB to 2MB, depending on which version of HD Setup is used.

Use HD Setup 1.3 only when it's necessary to restore a backup that was taken from a drive that was FORMATTED with HD Setup 1.3.
