TOPIC -----

There are some known issues with SimpleText 1.1.1 that have been reported as bugs.

DISCUSSION -----

- 1) In the about box, pressing a key brings up a "can't edit document" alert.
- 2) The screen redraws when you delete a line (i.e. delete past the beginning of a line so the insertion point moves up).

These bugs have been reported to engineering and Apple hopes to correct them in future releases.
