Newton 2.0 OS: Error -48200 Trying to Print (1/96)

Article Created: 22 January 1996

TOPIC -----

With my Apple MessagePad 120 using the Newton 2.0 OS, if I do a "selected" find, specifying the Dates application and a date range, and then try to print any of the items I get a -48200 error. What am I doing wrong?

DISCUSSION -----

This is a problem with the Dates application and affects both trying to print or fax the found items. However mailing or beaming the found items works correctly.

Workaround

=====

Step 1

Open the Dates application

Step 2

Use find to locate the information you are looking for.

Step 3

Print the information.

This will be fixed in a future System Update.
