Newton 2.0 OS: Alarm Volume Setting Muted (1/96)

Article Created: 24 January 1996

TOPIC -----

When I use the Prefs in the Extras draw to adjust the alarm volume to zero, then back to a different volume, the volume on the entire MessagePad gets muted. The Newton device then will not allow me adjust the volume, even though I change the setting in the Extras drawer.

DISCUSSION -----

This is a problem with the Alarm volume setting. The workaround is to turn the MessagePad off and back on. Next, open the Extras drawer and adjust the volume. The sound should return.

This will be fixed in a future System Update.
