## Display Card 8/24: RasterOps 19 724 Is Not Supported

This article last reviewed: 27 July 1990

TOPIC -----

I need to confirm that the Macintosh Display Card 8/24 does not support the RasterOps 724 19-inch monitor.

I know that the Macintosh Display Card 8/24 GC does not support the RasterOps 19-inch monitors based on its pinouts, but there is no mention of the Macintosh Display Card 8/24.

Are the pinouts for the Macintosh Display Card 8/24 GC the same as for the Macintosh Display Card 8/24?

DISCUSSION -----

The Macintosh Display Card 8/24 and the Macintosh Display Card 8/24 GC have the same connector and pinouts, and produce the same signals.

The RasterOps 724 19-inch monitor is not supported by either.
