## RGB-to-NTSC Video Converter

This article last reviewed: 11 October 1989

TOPIC -----

I am looking for a RGB-to-NTSC video converter that works well with ChunkTV.  
Any suggestions?

DISCUSSION -----

MARKERTEK Video Supply makes a RGB-to-NTSC video converter, model number  
RN-1. The 1989 catalog description reads:

RGB Plus sync input to NTSC video out. This card will only be  
effective if the horizontal scan rate of the input is close to  
the standard NTSC video horizontal sync frequency of approximately  
15.75 KHz. (This is what ChunkTV does.)

You still have to make a special cable for the Macintosh II extended video  
card--nothing terribly difficult, though.
