## Apple HD-20 (Non-SCSI): Which Macintosh Computers Support It

This article last reviewed: 27 February 1991

TOPIC -----

With what Macintosh models can I use a serial HD-20?

DISCUSSION -----

Support of the serial HD-20s is not tied to System Software, but to the ROM in the respective systems.

The following Macintosh models have support for the serial (non-SCSI) HD-20 built into ROM:

- Macintosh 512Ke
- Macintosh Plus
- Macintosh SE
- Macintosh Classic
- Macintosh IIfx
- Macintosh Portable

The following Macintosh models do NOT have this support built in:

- Macintosh SE/30
- Macintosh II
- Macintosh IIfx
- Macintosh IIfx
- Macintosh IIfx
- Macintosh IIfx
- Macintosh LC

For more information on the serial HD-20, see the article "Old HD20 and New Mac SE/30".
