## Color StyleWriter 2500: Premium Coated Paper Available (7/96)

Article Created: 12 July 1996

TOPIC -----

The Apple finished goods price list states that the Apple Color Ink-Jet Premium Plus Coated Paper (M4792G/A) is only compatible with the Color StyleWriter 2500 printer. Will it harm my other StyleWriter printers if I try to use it?

DISCUSSION -----

The Apple Color Ink-Jet Premium Plus Coated Paper is optimized for use only on the higher-resolution 720 DPI Color Ink-Jet printers. The Color StyleWriter 2500 is the only Apple color ink-jet printer currently available that can take advantage of the paper's special coated surface which controls ink flow and maximizes print quality. The Premium Plus paper will not harm other ink-jet printers if it is used, however, there is no advantage to upgrading to the more expensive Premium Plus paper stock unless it is used with the Color StyleWriter 2500.
