## No AppleTalk ImageWriter LQ Message May Be Bad Software/Card

This article last reviewed: 26 January 1988

Have you had this problem while using AppleTalk and an ImageWriter LQ?:

- Upon starting the application "The Namer" and selecting the AppleTalk ImageWriter LQ icon, you get a message saying that NO AppleTalk ImageWriter LQ is connected to the network -- even though one is properly connected?

Rather than a configuration problem, you are probably using corrupted software or a bad AppleTalk card. Try the job again with one or both of these variables replaced.
