## LaserWriter: Networking vs. Switch Box

Article Created: 19 April 1991

Article Last Reviewed:

Article Last Updated:

TOPIC -----

Can a Macintosh II and a Macintosh Portable share the same LaserWriter IINT using a switch box? Or am I better off using AppleTalk?

DISCUSSION -----

Because all three products you mention have networking capabilities built-in, there is no reason not to connect them together with LocalTalk. You can use a switch box, but it would not be easy, and it would be largely a waste of time.
