LaserWriter IISC: How To Print In Background Under MultiFinder

This article last reviewed: 6 May 1988

The LaserWriter IISC does print in the background under MultiFinder, but only under these conditions:

- You must use System 4.3. (This is documented in the Owners Manual.)
- You must INSTALL (not drag) the LaserWriter IISC driver into the System folder. If you drag the driver into the System folder, it will not work correctly when printing in the background. (This is not documented.)
