LaserWriter IISC: Engine's Page Count Can't Be Determined

This article last reviewed: 8 May 1990

TOPIC -----

Is there any way to determine the number of pages that have been printed on a LaserWriter IISC? As far as I know, the LaserWriter IISC has no counter.

DISCUSSION -----

There is no way to determine the actual number of pages that have been printed on a LaserWriter II engine, PostScript or QuickDraw.

The LaserWriter IINT and LaserWriter IINTX controller boards store the number of pages that the controller board has printed, but not the number of pages the engine has printed.
