LaserWriter Pro 810: Printing With Word Perfect on VAX (6/94)

Article Created: 24 June 1994

TOPIC -----

I am unable to print properly to the LaserWriter Pro 810 with Word Perfect on the Vax.

DISCUSSION -----

To print from Word Perfect you will need a special driver available from Word Perfect and you must also setup a generic print queue. The following steps must be performed to allow Word Perfect to print to the LaserWriter Pro 810:

- Contact Word Perfect to obtain the correct WP print driver. The driver name is LZR-1560.
- Execute the Apple supplied command procedure APPLE_QUE.COM and select the option called "generic queue". For more information on performing this step, refer to the LaserWriter Pro 810 installation and setup manual.
- Configure the new queue and driver into Word Perfect.
