## LaserWriter Pro 810 UNIX Utility: Available by ftp (9/94)

Article Created: 6 September 1994

TOPIC -----

I've got a LaserWriter Pro 810 and some UNIX workstations without floppy drives. My understanding is the LaserWriter Pro 810 UNIX disk is in UNIX or tar format, and is unreadable from a DOS or Macintosh computer.

Is there an ftp site where the LaserWriter Pro 810 UNIX software can be found?

DISCUSSION -----

You are correct, the LaserWriter Pro 810 Utility for UNIX workstations was distributed in UNIX tar format on a floppy disk, which cannot be read from a DOS or Macintosh computer.

We have generated a compressed tar format file of the LaserWriter Pro 810 Utility for a generic UNIX workstation. It can be found at:

ftp.support.apple.com (130.43.6.3) under the /pub/lw810 directory.

The Read Me is also included. The files you need are "lw810.unix.Z" and "lw810.unix.readme".
