LW Pro 810: Printer Utility Cannot Configure IP Address (6/95)

Article Created: 28 June 1995

TOPIC -----

I'm trying to set the IP address of my LaserWriter Pro 810 with the Apple Printer Utility. My LaserWriter 16/600 PS works fine, but I can't get the same dialogs to come up.

DISCUSSION -----

The Apple Printer Utility does not support the LaserWriter Pro 810, although the LaserWriter Pro 810 has enough common characteristics for some information to be retrieved. You should refer to the LaserWriter Pro 810 documentation to configure its various features.

You can also search the Tech Info Library for more information, use the search string, "Pro 810 and TCP/IP".
