## Installing 810 Software on Sparc Station (4/94)

Article Created: 20 April 1994

TOPIC -----

Software installation fails when installing on a Sun Sparc Classic running Solaris 2.2. Software installs properly on a Sun Sparc 10 model 41 running SunOS.

DISCUSSION -----

There was a minor problem with the first release of LaserWriter Pro 810 enstall utilities for compiling the codes on SunSparc station running Solaris 2.2 or 2.3. There is a newer version which is available. Users should run the "enstall" with the -b option to install on the system without compiling the codes.

The LaserWriter Pro 810 Utilities with pre-compiled executable binaries for Sun Solaris 2.2 or 2.3 has been posted to on-line services.
