Article Last Updated:

TOPIC -----

Given the lack of a Centronics interface, how can I connect a LaserWriter IIfx or IIfx to an MS-DOS PC?

DISCUSSION -----

For this class of product, Ethernet and SCSI interfaces are more important than Centronics. Centronics was omitted due to space constraints.

Here are two ways for PCs to connect to the printer:

- The LaserWriter IIfx and IIfx support fast serial communication (up to 57K baud) for direct connection.
 - LocalTalk cards from third parties enable PCs to share a LaserWriter.
- Copyright 1991, Apple Computer, Inc.
